

BUILDING FOR THE FUTURE

WEEKS 10 April 19th 2010

Brickwork on the building is almost complete and roof timbers are all in place. The roof tiling should start week commencing 26th April and then electrical and mechanical work can commence in the new building.

The build at the moment is a week ahead of schedule and we are on target for the handover of the building to take place in the last week of term. This progress is very encouraging.
