Inventions

Hawks

Term Five

Art

Investigating the work of Leonardo da Vinci and his impact not only as an inventor but also as an artist.

Science

In Science we will be exploring various individuals (inventors and scientists) that have had an impact on our understanding in a variety of different areas including David Attenborough, Margaret Hamilton (software), Leonardo da Vinci, and Eva Crane. work will also look at the advancements in CSI and how science can prove/disprove theories in other academic areas (Stonehenge). This term we will also be participating in the Key Stage Two trip to INTEC.

Music/Computing

Creating music using Garageband. Looking at how technology can support composition.

RE

How to make Wiltshire a more respectful place. Also work in Christianity will include looking at Trinity.

English

We will be revising all areas of SPAG this term in order to support the Year Six pupils in SATS. Their will also be a focus on reading comprehension skills. As well as this in writing we will be focussing on a science linked topic revolving around the work of Sir David Attenborough. Towards the end of term Hawks will be introducing free writing sessions in order to support creativity and the development of story writing skills.

PE

PE sessions will continue with Mr Smith looking at Athletics. In our other session we will be trying other sports such as squash and team games.

DT

Looking at the process of solving problems. We will also be beginning a mechanical task called Automata Animals which will run over the last two terms.

Mathematics

We will be revising all areas of Maths this term in order to help support the Year Six pupils for their SAT tests. In particular we will focus on fractions and written calculations.
